

**WEIGH RIGHT**  
*Automatic Scale Co.*

NEWS RELEASE February, 2014

Weigh Right's linear PMB scales are customizable for your customer's needs, like the PMB-2 scale shown below. Customer packed seeds into bulk boxes indexed by our HC-10 conveyor. They also had an extra large box they wanted to fill into but not remove the conveyor. Weigh Right designed the scale with a customized removable spout for both package presentations.

Shown: PMB-2 with customized attachable spout to reach over HC-10 Box conveyor when filling extra large boxes.

## Other Custom Machine Feature:

Multi-panel dusthood with easy-to-remove handles, tool-less assembly to maintain dust.

### Other Machine Features:

- Custom height to fit into customer's facility.
- Discharge hopper opening sized to provide optimum draining of product into the box without allowing the seeds to ricochet out.
- HMI with menu driven controls.
- Gravity feed design for faster weighing of bulk seed into the weigh bucket.
- Opposing gravity gates to avoid product pinching.
