

Weigh Right has a filling system that's right for YOU!

Boost your productivity and increase your profits...

Introducing the PMB Series Net Weigh Fillers, from the company that knows what it takes to put free flowing and non-free flowing product into your containers quickly and accurately.

Whether your volume is great or small, PMB fillers deliver consistent results. Each model features a two-stage, vibratory bulk and dribble system. Product transfers quickly from the supply hopper to the weigh hopper using a series of vibratory trays. When the target weight is accurately met, the product is dispensed into your package with little or no giveaway. And, to best deal with the "flow characteristics" of your product, we even tailor the tray configuration for proper movement and handling.

You have a need. We can fill it.

Make the right choice to reduce your labor, boost your productivity and increase your profits.

Choose Weigh Right and weigh your options right!

True Interfacing Versatility...

Whatever your needs, Weigh Right makes it easy to use new or existing equipment with a PMB Net Weigh Filler.

From baggers to conveyors to thermoformers, we design our frames around them all and can interface the controls for a smooth and seamless operation.

Look to Weigh Right for infeed conveyors, automatic indexing conveyors and unscrambling and accumulating tables.

Better by Design

Keeping you competitive.

Our equipment is designed and built with one goal in mind – to keep you competitive!

PMB flexible net weigh fillers are fast, accurate and built to last. This is because we use only the best quality, maintenance friendly, off-the-shelf parts and components available. It's why more and more customers are choosing Weigh Right to fill their needs again and again.

Our quality fillers offer more than meets the eye.

Options and upgrades.

To ensure our equipment can best handle a variety of applications, we offer many options. And, while each model comes "ready to perform", selecting an option or upgrade today may prepare you for the future. For those in the food, pharmaceutical and cheese industry, we can meet USDA and WDA requirements.

Tailoring tray configuration.

Products vary. To deliver accurate fills we tailor the right tray configuration for your application.

Forward thinking.

Weigh Right continually reviews equipment upgrades and technical advancements, to provide new and improved ways of bringing our customers the best the industry has to offer.

From the ground up, we design and build each piece of equipment to the highest quality standard, then back that equipment with a level of service that reflects our commitment to you.
