Filling Partially Cooked Bacon Pieces into Pouches

For customers who need to package food service quantities of cooked bacon pieces, Weigh Right offers our USDA belt feed scale model, the BDC-2 . This dual lane scale system offers a complete solution with infeed conveyors metering product to the scale heads and dual discharge funnels to fill into a 2-up pouch configuration into a thermoforming packaging machine . It also includes an automatic tamper to help ensure product stays below the seal line. Click video link below to see the BDC-2 in action.

BDC-2 dual lane scale designed to fill into a thermoforming packaging machine

See our [new video](#) for more features.
