

Weighing In

A newsletter from Weigh Right

Filling fragile product into trays

For customers who need to quickly and accurately package fragile products into trays, Weigh Right offers our PMB-4 linear scale with a triple tray feed design for accuracy and gentle sloping discharge hoppers for careful filling into the trays offering a rate up to 40 trays per minute (10 indexes x 4). [Click on the video link below to see it in action.](#)

PMB-4 Scale shown with 15' cleated indexing conveyor.

Product gently slides out of the weigh buckets and into the clamshell trays. Conveyor features underbelt vibrators to settle product.
