

Weighing In

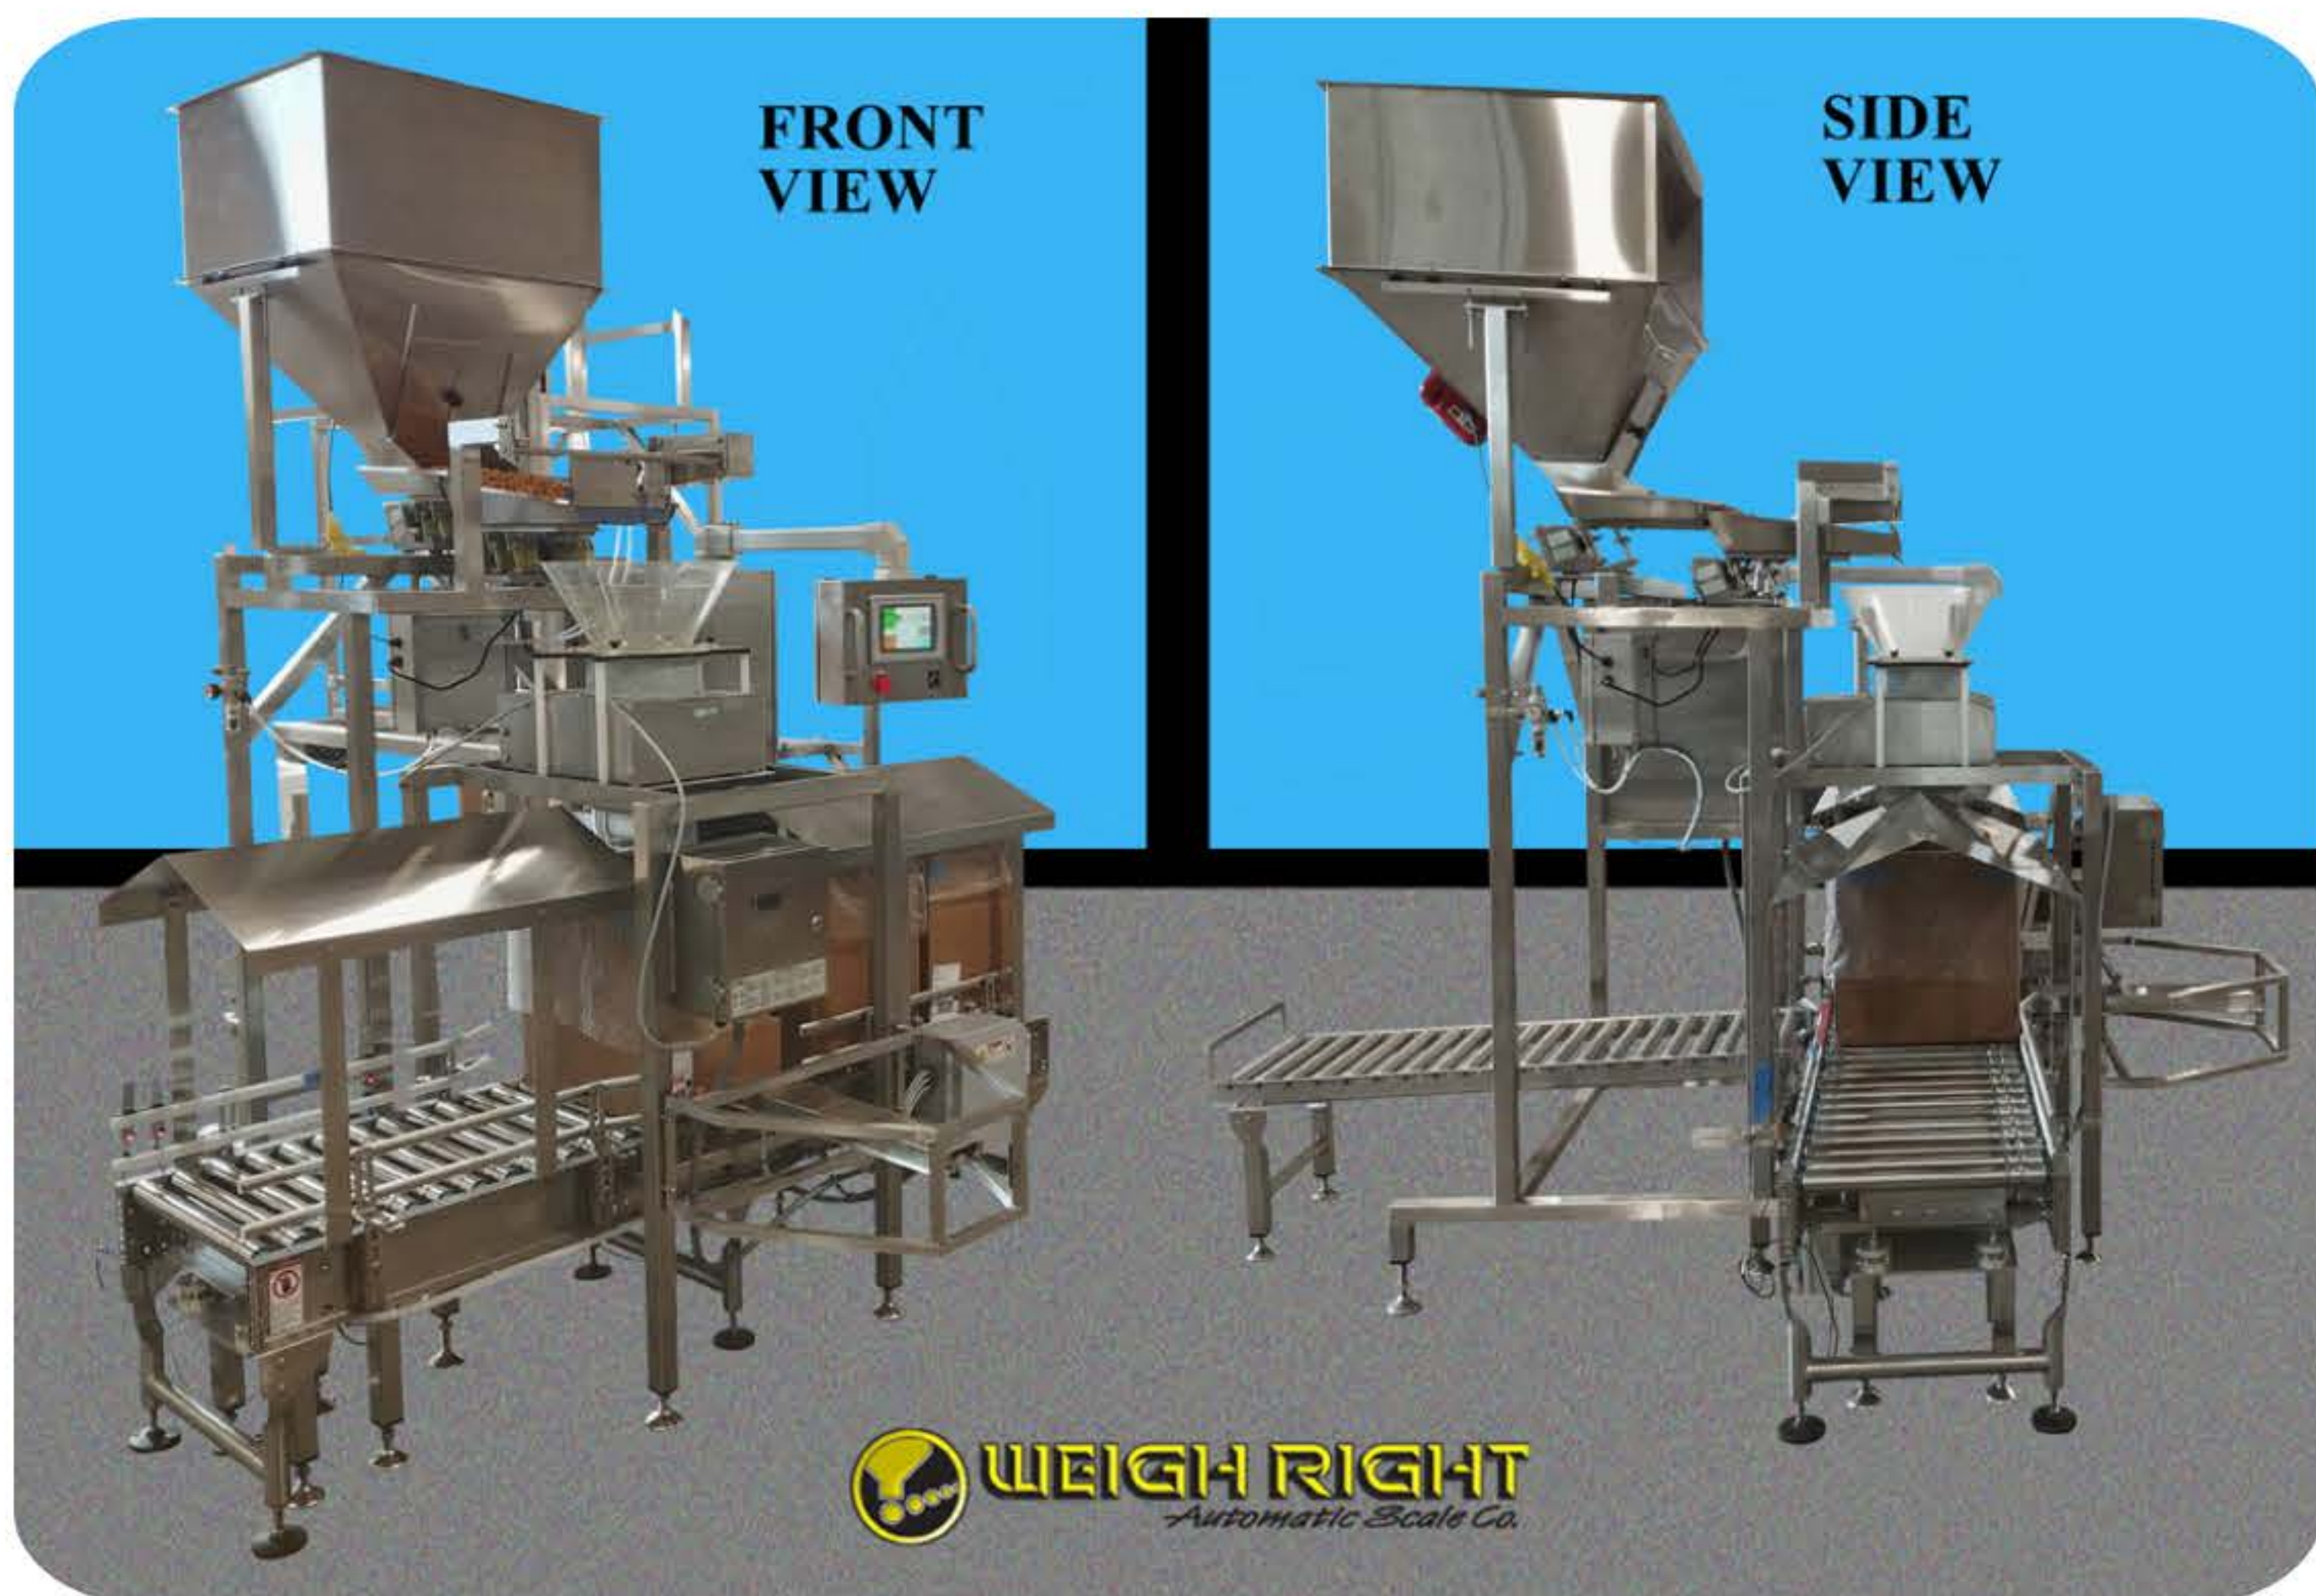

A newsletter from Weigh Right

Gently Filling and Weighing Product into Cases

Weigh Right offers many [bulk filling solutions](#) but for customers who need to gently fill cases with 10 to 50 lbs. of product, Weigh Right offers our [G-50-HC Series](#) offering a short drop into the case. Typical applications require 1 to 6 fills per minute. Products can be snack foods like crackers and bakery products like cookies, plastic or metal pieces, gel tablets, nuts and similar. Main benefits are a shorter drop into the case and a lower height system compared to our many net weigh scales. [Click on the video link below to see the G-50-HC in action.](#)

G-50-HC Scale shown optional Metal Detector Support (MD supplied by others), Reject Conveyor, Pendant Arm, Light Tower and Allen Bradley Controls

G-50-HC Customized for our customer to include Product Dust Shield, Reverse Carton Reject if metal detected, and Supply Hopper Extension
