

# Weighing In

A newsletter from Weigh Right

## Blending 4 ingredients by weight.

For customers who need to blend dry ingredients by specific weights into a common package, our PMB-4 net weigh scale is ideal for filling 2 to 4 ingredients at a rate up to 10 to 20 fills per minute.

When filling a single ingredient the PMB-4 can provide up to 40 fills per minute when used with an automatic bagger or container indexing line.

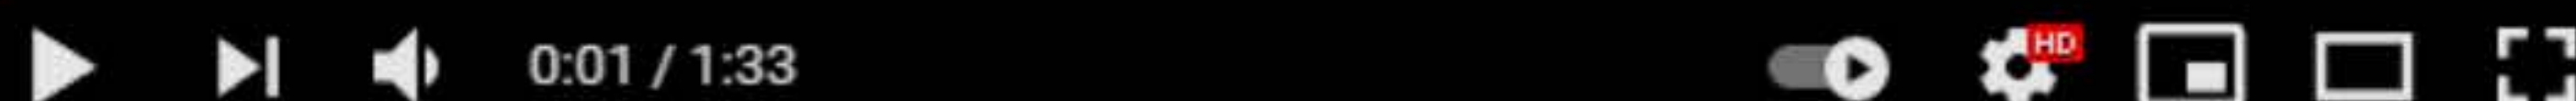

PMB-4 Scale shown with 4 separate ingredients to be filled by weight. Supply hopper provided with dividers to avoid products mixing in the hopper.
