A newsletter from Weigh Right

iQ-1E scale helps eliminate crumbs.

For customers who package products that shed unwanted crumbs and are bulky, i.e., popcorn, crackers, small cookies and similar, Weigh Right offers our iQ-1E entry level scale with a two-tray vibratory feed design that provides optimum control of product feeding and a perforated tray to help reduce crumbs before they go into the bag.

Shown Above: iQ-1E two-tray feed design to handle bulky products with a perforated tray to let crumbs drop thru before going into the bag.
