

Weighing In

A newsletter from Weigh Right

Filling a Moist Product into a Bag

For customers who need to package moist products into bags, Weigh Right offers our BDC Scale Models that utilize bulk and dribble belts to quickly and accurately move the product into weigh buckets.

The weigh buckets are designed with a form-fitting push-plate to ensure a clean discharge of the product that was weighed getting it all into the bag [click here to view the video.](#)

BDC-2 shown with stainless frame to mount over vertical bagger (made by others) and infeed conveyor.
