

Weighing In

A newsletter from Weigh Right

Weigh Right's Gravity / Vibratory Scale

For customers who package free flowing products into 5 lb. to 50 lb. packages, Weigh Right offers our FL series of gravity / vibratory scale fillers that use both gravity plus vibratory-feed to reach the bulk portion of the target weight and top it off for accuracy with the vibratory tray feeding the product at a slow rate. Ideal products range from rice, beans, pet foods, cat litter, salt and virtually any dry free flowing product.

See our new video of the PMB-1FL.

Shown Above: PMB-1FL single lane scale designed for semi-automatic use with an operator.
