# IC-45 INCLINE CONVEYOR

*Fully automate with your new scale*

**Performance:** The IC-45 will convey food or non-food products to the scale's supply hopper. The hopper level is controlled by a sensor that turns the conveyor on and off keeping an optimum level for the scale to weigh and fill the product quickly and accurately.

PMB-1 Single Lane Scale

PMB-2 Dual Lane Scale

PMB-3 Three Lane Scale

**MORE AUTOMATION:**  
Add an optional vibratory Stoker Feeder allowing a larger volume of product to be stored and automatically filled to the conveyor.

An optional perforated tray can be added to the Stoker Feeder to help eliminate fines letting them sift thru holes in the vibratory pan to a collection tub below.

Stoker Feeder
