Bulk Filling Chopped Nuts into Cases

Weigh Right offers our high throughput bulk net weigh scale system. Shown below is the Weigh Right model iQ-3602-HD to accurately and quickly fill various nutmeats into 25 lb. cases. Optional feature shown in this photo is the mounting of a flow-thru metal detector at 45 degrees (for gentle loading). If metal is detected, the system will STOP and turn on the alarm and require a reset. This project included a custom case indexing conveyor design for a wrap-around production flow.

[See our new video of the iQ-3602-HD.](#)

Shown Above: iQ-3602-HD bulk filling scale with curved case conveyor and flow-thru metal detector (provided by others, mounted by Weigh Right).
