

Weighing In

A newsletter from Weigh Right

Weighing and filling sticky products directly into the case!

For customers packaging slightly sticky or moist products into bulk cases, Weigh Right offers our G-50-BDC Direct Fill Scale. The G-50-BDC utilizes a bulk and dribble belt to feed the product quickly and accurately into the case which is automatically indexed onto the weighing zone that has load cells installed within the frame. The power roller conveyor uses multiple zones to control the indexing of the cases in-and-out keeping the line moving quickly and efficiently. Click the link below to see the G-50-BDC in action:

[See our new video of the G-50-BDC.](#)
