

Weighing In

A newsletter from Weigh Right

Bulk Filler for packaging in-shell peanuts into cases or bags.

Weigh Right offers our iQ-3601-HD vibratory bulk filling scale designed to fill 5 lbs. to 50 lbs. of dry free flowing products like in-shell peanuts into cases or bags. The iQ-3601-HD can weigh and fill 25 lbs. of in-shell peanuts up to 7 cases per minute when combined with our HC-10 indexing conveyor for automatic operation.

The scale can also be outfitted to fill into bags semi-automatically requiring an operator to hand-place a bag into the bag clamp which will hold the bag securely. An adjustable height bag shelf can be added to support the weight of the bag during the discharge of product into the bag. Both washdown and non-washdown options available.
