A newsletter from Weigh Right

## Packaging fresh-cut lettuce with our FCS-1 scale!

Weigh Right offers our FCS-1 belt feed scale designed to fill 1 lb. to 10 lbs. of fresh-cut lettuce or diced / sliced vegetables. Machine is also suitable for portioning refrigerated foods.

The FCS-1 comes standard as a washdown model and offers an infeed conveyor with an optional (LBB) Live Bottom Bin that has a conveyor for receiving a large load of product from a spin basket, and feeds the product first-in-first-out to the incline conveyor.

Other features include a bag clamp to hold the bag during filling and a push-plate to ensure a clean discharge of the portioned product.

Weigh Right offers a single lane (FCS-1) or our double lane (FCS-2) for faster rates. Both semi-automatic and fully automatic models are available.

[To learn more, see our new video of the FCS-1](#)
